

FOR IMMEDIATE RELEASE

Inc. Magazine unveils 2009 exclusive list of America's Fastest-Growing Private Companies – Inc. 5000

Cambridge NanoTech ranks no. 707 with three-year sales growth of 401.1%

CAMBRIDGE, Mass., August 12, 2009 – *Inc.* Magazine today ranked Cambridge NanoTech #707 on its third annual [Inc. 5000](#), an exclusive ranking of the nation's fastest-growing private companies. The list represents the most comprehensive look at the most important segment of the economy—America's independent-minded entrepreneurs. Consumer electronics maker Vizio, Internet giant GoDaddy, rental car service Zipcar, and beverage maker Honest Tea are among the prominent brands featured on this year's list.

Dr. Jill S. Becker, president and CEO, established and self-funded Cambridge NanoTech in 2003, driven by an unwavering desire to bring awareness of atomic layer deposition (ALD) to the marketplace, and to innovate new ways to use this science to help others succeed in their research and manufacturing efforts. Boasting a three-year sales growth of 401.1%, the company is ranked #21 in the manufacturing sector and #27 in the Boston metro region. They will be honored on September 23–25, 2009 at the Inc. 500|5000 Conference & Awards Ceremony at the Gaylord National Resort and Convention Center in National Harbor, Maryland.

“The Inc. 5000 recognizes the contributions of tremendously talented teams within privately-held companies that may not otherwise gain visibility in the media,” said Becker, president and CEO at Cambridge NanoTech. “We’re poised for ongoing growth in the coming years and we are grateful to be recognized for our hard work among this impressive list of industry leaders in the US.”

About Cambridge NanoTech

Cambridge NanoTech focuses on simplifying the science of [atomic layer deposition](#) for customers worldwide — from universities to the largest corporations — by delivering

comprehensive services and versatile, turnkey systems that are accessible, affordable and accurate to the atomic scale. Cambridge NanoTech, founded in 2003, grew directly out of Gordon Lab at Harvard University, one of the foremost ALD research groups in the world. Learn more at www.cambridgenanotech.com.
